

Fiberstars EFO Adaptor

Fiberstars compatibility with UFO quality

If you are one of the many people who have, in the past, purchased a fiber optic harness for use with a Fiberstars EFO-1+1 or EFO-AG illuminator, you may know that it is now virtually impossible to purchase a compatible, replacement illuminator.

With the EFO adaptor from UFO, your search is at an end!

Simply fit our adaptor collar over the fiber port, and insert the light amplifier into the port.

Secure with the supplied screw and then attach your Fiberstars harness as normal. You can now benefit from the great light output and features of a UFO illuminator without having the cost of replacing your fiber harness.

GENERAL INFORMATION

Port Connector Size	1" 7/8 ACME 10 thread, compatible with Fiberstars EFO-1+1 & EFO-AG
Fiber Type	For use with standard Fiberstars EFO-1+1 / EFO-AG PMMA harnesses
Compatible UFO illuminators	Nova, Cube, Vega Slimline, Vega Decorative, Sirius White Light[1], Sirius Decorative[1]

[1] Both Sirius models require a new collar to be fitted to the illuminator in order for the adaptor to fit. If you are purchasing an adaptor for retro-fitting please tell us if it is for a Sirius so we can include the new collar.

Compatible Fiberstars Products^[2]

EFO Large Core Fiber / Pre Assembled Harnesses

Fiberstars Part No.	Description	Each Fiber OD	Each Fiber ID
EFO-HF5-9/8-10 or XX	5 Way	9mm (0.354")	8mm (0.266")
